

Maths for week beginning 04.05.20

Hi all - Happy Star Wars day, "May the 4th be with you!" We hope you have had another good week and have enjoyed consolidating your understanding of unit and non-unit fractions. This week the focus for maths continues to be fractions and decimals. The next step for year 3s in learning about fractions is to find fractions of objects like cake and pizza and to find fractions of numbers. For year 4s, the focus continues to be on decimals with a focus on hundredths.

This week there are five lessons from White Rose home learning. All of the lessons are from week 2 (not summer week 2) so click the link for your year group and select **week 2**. Watch the lesson video (you can watch it as many times as you like) then complete the task sheet for that lesson. There is also an answer sheet (for parents) to check your work. If you do not have access to a printer just use any type of paper, pens, pencils and practical resources e.g. small toys, Lego, pasta, money etc. to complete the tasks.

Please click on the links below to access the videos for your year group. There is one lesson for each day however do not worry if you do not manage to complete all five.

Year 3

<https://whiterosemaths.com/homelearning/year-3/>

Year 4

<https://whiterosemaths.com/homelearning/year-4/>

If you are a big fan of maths and would like extra maths to do, try the challenges on <http://www.iseemaths.com/lessons34/> each day there are different challenges for you to complete.

Please let us know how you are getting on and if we can help in anyway.

Mrs B, Mrs P, Mrs S and Mrs A

PS. Please keep practising your times tables, they can come in handy for learning about fractions and decimals. 😊
