

Year 5/6 Home Learning Pack

Week beginning 13.07.20

This week's pack contains the following:

- Reading - Finish Holes and write a book review!
- Maths - Working on coordinates and translation.
- Writing - As your final writing task of the year, we would like you to create a non-chronological report on a country in South America.
- Yorkshire Water have put together a collection of activities to learn about the uses of water and water safety.
- PSHE - In the pack this week you will find some activities to complete related to your goals and plans for the future.

Well done for all the hard work and time you have put into your home learning. You should be very proud of yourselves. It has been a very unusual time for us all and you have all adapted to the changes which says a lot about your personalities and resilience.

We hope you have a fantastic summer and enjoy your time before we are hopefully all back at school and find our new normality in September!

Stay safe everyone

From all the year 5/6 practitioners.
