

Maths for week beginning 20.04.20

Hi all, we hope everyone has had a good Easter break and that you have not been working too hard or eating too much chocolate! The year 3/4 teachers think that it is time to begin to send you more specific maths to continue your learning. If we were in school, we would have been teaching and learning about fractions and decimals using a range of resources including some from White Rose Maths. With this in mind here are 5 lessons taken from the White Rose home learning site.

All of the lessons are from week 1 (not summer week 1) so click the link for your year group and select **week 1**. Watch the lesson video (you can watch it as many times as you like) then complete the task sheet for that lesson. There is also an answer sheet (for parents) to check your work. If you do not have access to a printer please just use any type of paper, pens, pencils and practical resources e.g. small toys, lego, pasta, money etc. to complete the tasks.

Please click on the links below to access the videos for your year group. There is one lesson for each day however do not worry if you don't manage to complete all 5.

Year 3

Year 4

<https://whiterosemaths.com/homelearning/year-4/>

We hope this is a more focussed way for you to learn and practise your maths and that you most importantly have fun. Please let us know how you are getting on and if we can help.

Mrs B, Mrs P, Mrs S and Mrs A

PS. Please keep practising your times tables, they can come in handy for learning about fractions and decimals. 😊
